

Planning & Time Management

Writing a piece of work, and revising can often take longer than you think. It's important to plan your work or revision well in advance of the deadline.

Note-taking & Referencing

Ensure that you carefully document the source of information including full citation details. If you are noting down quotes, a top tip is to use a different coloured pen, or quotation marks.

Using Tools for Learning

Attend a Turnitin workshop to understand how best you can use it to improve your academic work. You can also use apps and other software to help organise your research and notes.

Support & Wellbeing

Contact your supervisor or tutors for help and support relating to academic work and use opportunities to get formative feedback. If the unexpected happens and there are exceptional circumstances, make sure to tell someone- don't suffer in silence. There are systems in place to support you.

Avoiding Academic Misconduct

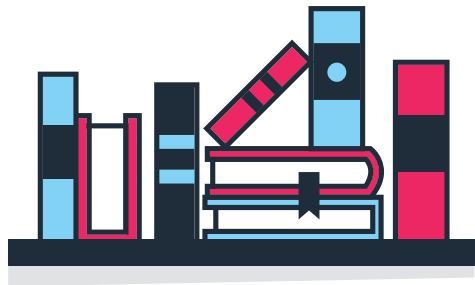

Not planning in advance and managing your time effectively, or note-taking poorly has the potential to lead to academic misconduct. Make sure you study smart to avoid finding yourself in this situation. Remember that there is help if you need it!
